

T9-1 Primary Universal Term Universal Hierarchy

This is the Universal Hierarchy similar to T9 of System 4. Being primary to the recall process, it implicitly has discretionary characteristics. The Host Idea(1) directs Conscious Knowledge(2) which directs Emotional Knowledge(3) which directs somatic and autonomic Routines(4) which directs Behavioral Form(5). It distinguishes Emotional Knowledge(3) from Conscious Knowledge(2). The Host(1) person thus Consciously(2) directs Emotional Knowledge(3) that integrates emotional patterns of the autonomic nervous system via the limbic system that fuels Routines(4) that animate the physical Form(5) of behavior. This Primary Universal Term is associated with the archetype of the species and applies to all human beings. It works in conjunction with the Secondary Universal Terms associated with the archetype of each person. It prescribes five successive Steps in each System 5 Cycle.
